

Coles 4038

Ribbon, bidirectional.

Description:

- Substantially flat frequency response from 30 to 15,000 c/s
- Extremely low (non-linear) distortion
- Exceptionally low hum pick-up
- Bi-directional (figure of eight) polar curve shape accurately maintained in both horizontal and vertical planes
- Excellent transient response
- Natural clear balanced response to sound signal
- Body shape to enhance acoustic performance
- Clear natural high fidelity sound reproduction
- Smooth sonic textured response

Applications:

Beautiful for drum overheads and can do the full kit for jazz etc. Commonly used for brass, strings, and room mics.
